

The Heritage Society of Engineers Ireland, in association with Structures and Construction Division host:

An evening lecture.

CONSERVATION OF RUINS

With examples from Ireland, England and Wales

By

JON AVENT

CEng MStructE IHBC CARE Accredited Conservation Engineer

The talk will cover some of the challenges faced in the stabilisation of ruins. It covers the approach to dealing with ruined masonry structures and the need to understand the structure before embarking on conservation strategies. It considers the approach from initial survey through to the implementation of remedial works. Cases studies are presented on a selection of ruined structures from Ireland, England and Wales.

An overview of the Conservation Accreditation scheme 'C.A.R.E' administered by the Institution of Civil Engineers and the Institution of Structural Engineers will also be given

Monday 21st February 2011

at 7.30pm
