

The Irish Concrete Society

The Effects of Freeze Thaw on Concrete

Half-Day Seminar

to be held at the Louis Fitzgerald Hotel, Naas Road, Dublin

29th March 2011

Registration and Breakfast - 8:00 am to 9:00am

Seminar - 9:00 am to 1:00pm

This seminar is targeted at clients, designers, contractors, suppliers, specifiers, academics and researchers.

Over the past two winters Ireland has experienced temperatures consistently below freezing. This has resulted in concrete being exposed to cycles of freeze-thaw, and in many cases de-icing products which have caused damage.

This seminar discusses the causes of this damage, current practice with regard to specification and workmanship and possible solutions to prevent this damage occurring.

The seminar will be chaired by Dr Roger West (TCD) and the speakers include Dr Mark Richardson (UCD), Mr Gordon Ellis (Mattest) and Mr Brian Curtis (Curtis Enterprises).

The cost of the seminar which includes breakfast and mid-morning tea/coffee is:

Irish Concrete Society Members	€75
Irish Concrete Society Non Members	€90
Retirees / Students / Unwaged (limited number of places)	€35

To register please contact Emma Flood at 041 9876466 or secretary@concrete.ie.

The closing date for applications is Wednesday 23 March 2011.
