

EVENING LECTURE

The Design and Construction of New Mizen Head Footbridge

Mizen Head Footbridge in County Cork is a reinforced concrete through-arch structure spanning 50m. The original structure was completed in 1909. After 100 years of service the bridge was demolished and reconstructed in 2009 and 2010. This paper describes the design and construction challenges of safely demolishing and reconstructing the bridge in a difficult site location.

6.30pm, Wednesday 25th May, 2011
Engineers Ireland, 22 Clyde Road, Dublin 4

Speakers will be from the Project Steering Group:

Murt Coleman, *Managing Director, Carillion Irishenco Ltd.*
