4th December 2013

Re. Short course offering – Building Regulatory Engineering

Dear Sir/Madam,

I am pleased to advise that the Department of Civil, Structural & Environmental Engineering intends, subject to sufficient demand, to run a Building Regulatory Engineering short 4 weekend course in March/April 2014. This newly updated course, will cover the recently enacted Building Control Amendment Regulations 2013, together with it’s associated draft Code of Practice. This SI 80 will significantly change the way buildings are inspected and certified, and hopefully in turn bring more work to construction professionals. Part of the inspection procedure will now include CE marking of materials in accordance with the new Construction Products Regulations which came into effect this July. A 3rd area that has been added to this short course is the new Energy Performance of Buildings Regulations 2012. This course also addresses all key aspects of the building regulations, provides a brief introduction to the Eurocodes, and should be invaluable to both new users of the building regulation guidance documents, and those that may enjoy a refresher course. All those involved in the construction industry will find this short course useful, particularly those involved in design, detailing, construction overseeing & inspection, and certification of building projects.

The Module Descriptor CIVL8004 is the module on which this short course is based and further details of this module may be found on the web at modules.cit.ie Successful completion of this course will lead to a CIT single subject certification award in Building Regulatory Engineering. The award represents 5 credits at level 8 of the NQAI framework. Please note that the assessment will comprise of a series of assessments throughout the four weekend delivery. The minimum entry requirement for the course is a level 7 in Civil/Structural Engineering or Architecture/Architecture Technology or other cognate discipline. The course fee is €495 which includes all course notes and assessment fees. A provisional schedule of delivery activities has been developed, copy attached. We will endeavour to keep to the proposed schedule/timetable, however it is subject to change.

The lecturer giving this short course is a member of the Institute of Structural Engineers and has worked in the area of Fire & Building Control for many years. He is in regular contact with the NSAI and the DOECLG in relation to building regulation issues. If you require further details please contact the Course Coordinator Mr. Andrew Macilwraith on 087-2405605 or by email at andrew.macilwraith@cit.ie

If you are interested in attending please apply online. We will write to you during the week starting 10th March 2014 to advise if you have been offered a place on the course. An booking deposit of €250 will be required with the remainder of the fee due prior to the commencement of the course on March 21st.

Yours faithfully

Des Walsh
