

Engineers Ireland Heritage Society in association with Structures & Construction Division & The Institution of Structural Engineers

St Mel's Cathedral – Engineering our Heritage

Gutted by a fire on Christmas Eve 2009, St Mel's, one of Western Europe's largest conservation projects, currently underway, is nearing the end of its complete refurbishment.

Presented by:-

Kevin Fay BSc (Eng.), Dip Eng., MIEI

Is a qualified Structural Engineer and Contracts Director with GEM GROUP, one of Ireland's Leading Construction & Joinery Manufacturing Companies. Kevin, previously an associate Director of Malachi Cullen & Partners Consulting Engineers has over 20 years' experience in both design and construction. Currently Kevin is the Director of Gem Purcell Ltd, a JV Company with the responsibility for delivering the conservation and restoration of St Mel's Cathedral.

Jonathan Macauley BEng CEng MStructE MIEI

Is a director of DESIGN ID, employed by Gem Purcell Ltd for the specialist timber design of the large span replacement timber roof & ceiling structure to St. Mel's. Jonathan graduated from Queen's, Belfast with a 1st Class Honours Degree and while working with O'Connor Sutton Cronin was nominated Chartered Engineer of the Year by Engineers Ireland 2006. Jonathan brings a creative yet practical edge to the design of buildings and unusual structures. He is also currently a tutor on the MArch course at Queen's University, Belfast.

7.30pm Monday 20th October 2014
