

One Day Seminar

Drawing Gym for Engineers – Trevor Flynn

© Drawing at Work

This course has been specifically developed for engineers; each attendee works from the unique Drawing Gym exercises to rapidly learn and apply techniques including axonometric, 1 and 2 point perspective, and section. The course motivates people to communicate effectively and provides a broad set of skills for expressing ideas in the design process. Practical work is supplemented with demonstrations, short films, and examples of contemporary freehand drawings from the DRAWING AT WORK on-line gallery. Individuals are encouraged to progress at a comfortable pace in a stimulating and supportive atmosphere. Prior to the classes we will discuss the kinds of drawing and visualisation strategies we can help you with and each course will be bespoke to the requirements and levels of existing abilities in the group.

9am to 5.30pm. Refreshments and a light-lunch shall be provided to each attendee.

DUBLIN – Friday October 19th 2018 – DIT Bolton Street

CORK – Monday October 22nd 2018 – Rochestown Park Hotel
