

Building Control (Amendment) Regulations & Construction Products Regulation

Wednesday 25th September 2013; 18.30

Room 281, DIT Bolton Street – Everyone Welcome

Abstract

Many of the building regulations have been updated and revised recently to reflect the move to Eurocodes and the introduction of the Construction Products Regulation. John Wickham Architecture/Building Standards in The Department of the Environment, Community & Local Government will present to the Institution of Structural Engineers on these changes in a talk entitled “The Essential Changes for Building Industry Professionals”. The talk will also cover the Construction Products Regulation which requires mandatory CE MARKING of all construction products from July 2013 in line with the harmonised European Standards

The Building Control (Amendment) Regulations have come into force on the 1st March 2013. Following on from the hugely successful presentation held by the Institution of Structural Engineers in conjunction with the Institution of Civil Engineers (ICE) we are delighted that **Martin Vaughan** Architecture/Building Standards Department of the Environment, Community & Local Government will provide an update on the Building Control (Amendment) Regulations.

Venue: Rm 281 DIT Bolton St.

Date: Wednesday, 25th September, 2013

Time: Reception: 18:00, Lecture: 18:30

Everyone Welcome
