Preview of Structural Use of Glass in Buildings Second Edition

By

Chris O'Regan BEng(Hons) CEng MIStructE

Technical author of Structural Use of Glass in Buildings 2nd Edition

This talk is a preview of Structural Use of Glass in Buildings – 2nd Edition that is a new guidance text due to be published in January 2014. Presented by Chris O'Regan, the book's technical author, a glimpse of what is contained in the text as well as a worked example of how to design structural glass elements using limit state theory will be given. This presentation will be the book's first public outing and exclusive preview content will be provided to attendees.

Tuesday 10th December 2013; 6.30pm

Room 227 - DIT Bolton Street – EVERYONE WELCOME !
